

Abstract

You and your team could control your processes better with access to the best-available web handling and coating science. Now such access is easy via the free Practical-Webhandling and Practical-Coating apps from www.stevenabbott.co.uk. In this talk, a selection of the apps is shown live to demonstrate the ease and power of this approach. With a phone, tablet or laptop anyone from operator to VP Engineering can upgrade their knowledge and troubleshoot more effectively. The talk itself will be short, allowing attendees to challenge the speaker with their problems and issues.
